

cGate Health, Inc., provides mobile and web-based software applications that enable physicians, nurses and clinicians to order, view, manage, trend and share patient laboratory information in real-time.

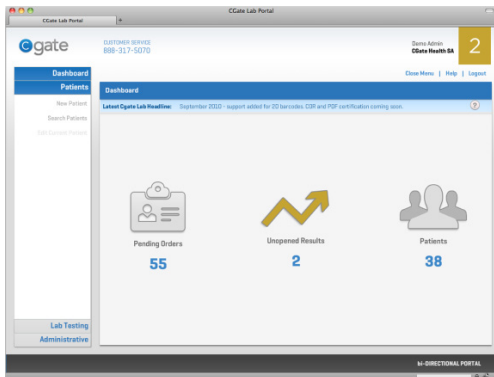

Our software is simple to use, reduces costs and errors, and improves operational efficiency and outreach programs. What's more, it meets meaningful use and CLIA requirements today!

cGate is easily customized and seamlessly integrates with any Health Information Technology (HIT), Electronic Health Record (EHR), Continuity of Care Record (CCR) and Lab Information System (LIS).

### Mobile lab innovation at your fingertips

Clinical mobility is the mindset that doctors and nurses must have the tools and means to place orders, review results, and move workflow forward from anywhere, at anytime, and from any device with ease. Clinical lab results represent over 70% of the data in the health record and influences upwards of 80% of doctor's clinical decision-making. cGate's web desktop and mobile platform delivers meaningful impact vertically on any hospital or clinic regardless of size, profile or specialization - Today!

**Hospitals** – Reduce costs and errors, improve workflow, increase efficiency and meet meaningful use requirements today!

**Physicians and Nurse Clinicians** – Access lab results any time and any place. Reduce the time it takes to order, view and visualize patient lab data. Easily share and re-order within a single application from any device.

**Clinical Laboratories** – Accelerate your physician outreach program. Drive (and retain) physician practices to your lab (and hospital) services.

**HIT / HER Vendors** – Integrate cGate and enhance your current clinical mobility offering by providing bi-directional lab data exchange.
